BACKGROUND OF THE INVENTION

The present invention relates to a method for determining a pattern for modulating the power of a laser beam, an apparatus for recording data in an optical recording medium and an optical recording medium, and particularly, to a method for determining a pattern for modulating the power of a laser beam which can determine a pattern for modulating the power of a laser beam so that data can be recorded in a write-once type optical recording medium with a laser beam having a low recording power at a high linear recording velocity, an apparatus for recording data in an optical recording medium which can determine a pattern for modulating the power of a laser beam so that data can be recorded in a write-once type optical recording medium with a laser beam having a low recording power at a high linear recording velocity, and a write-once type optical recording medium which can determine a pattern for modulating the power of a laser beam so that data can be recorded therein with a laser beam having a low recording power at a high linear recording velocity.

DESCRIPTION OF THE PRIOR ART

Optical recording media such as the CD, DVD and the like have
